[What is Vim online?](#)

Vim online is a central place for the Vim community to store useful Vim tips and tools. Vim has a scripting language that allows for plugin like extensions to enable IDE behavior, syntax highlighting, colorization as well as other advanced features. These scripts can be uploaded and maintained using Vim online.

Vim - the ubiquitous text editor

Vim is a highly configurable text editor built to make creating and changing any kind of text very efficient. It is included as "vi" with most UNIX systems and with Apple OS X.

Vim is rock stable and is continuously being developed to become even better. Among its features are:

- persistent, multi-level undo tree
- extensive plugin system
- support for hundreds of programming languages and file formats
- powerful search and replace
- integrates with many tools

Vim 8.0.0430 is the current version

Secure connection available

[2017-02-13] Notice the "go to HTTPS page" link in the header? Use it to go to the securely connected version of the same Vim pages. This runs on the sourceforge servers, thus the URL cannot end in vim.org. This is especially recommended if you upload or download scripts. (*Bram Moolenaar*)

Vim 25 birthday presentation

[2016-12-14] On November 2nd I did a presentation about Vim at Google Zurich. This is exactly 25 years since the first public version of Vim was built. The presentation gives an overview of Vim history and highlights the important choices that were made. With background information on my personal life and what was the state of computing, the context in which Vim was developed. You can find it [on Youtube](#). (*Bram Moolenaar*)
